Maintenance Services

Avoid breakdowns, reduce costs – gain peace of mind

We keep it all running like clockwork

Our maintenance services are like preventative treatment for your systems and precious plants – routine inspections by an expert eye, which keep everything ticking along and give you peace of mind.

In Victoria, water is increasingly being recognised as a precious commodity. Governments at all levels, businesses and families are looking to become wiser with water: to save money and our precious resources.

Water wisdom is Rosebud Irrigation

Our wide range of services creates efficiencies in the whole water cycle: from its collection, distribution, storage, use, re-use right through to its disposal.

We practice and promote water wisdom in every facet from domestic sprinkler installation that saves you money, time, cuts your water bills and complies with ever tightening water restriction through to the design and completion of our major government and commercial contracts.

In the 20 years that Rosebud Irrigation has been in business we've built a loyal and large client base on three fundamental strengths:

- fast response times and job turnaround
- professional service
- quality jobs that work and keep on working.

Areas of expertise

- Buried drip systems for recycled water
- Diesel pump set engineering
- PC based irrigation control and monitoring
- Central control software
- Subsurface drainage
- Wastewater filtration, pump and irrigation selection

Certifications

- IAA Certified Irrigation Operator
- IAA Certified Irrigation Manager
- IAA Certified Irrigation Installer
- IAA Certified Irrigation Contractor
- IAA Certified Irrigation Agronomist
- IAA Certified Irrigation Auditor Landscape
- Diploma of Irrigation
- Licensed Plumbers
- Licensed Electrician
- Licensed Plant Operator
- Confined Spaces Certification
- Qualified Pump Service Personnel
- OH&S Policy
- First Aid Certification
- Qualified Horticultural
- Rainbird Maxi System Certified

Industry affiliations

Rosebud Irrigation is a member of the following Associations:

- Irrigation Association of Australia (IAA) Certified
- Landscape Industry Association of Victoria (LIAV)
- Plumbing Industry Commission

Maintenance Services

How it works

(... and keeps on working!)

Rosebud Irrigation's Maintenance Services are fundamentally about protecting expensive assets and mission critical systems – such as water meters and bore pumps.

A typical Irrigation Maintenance Schedule would involve thorough checking and testing of:

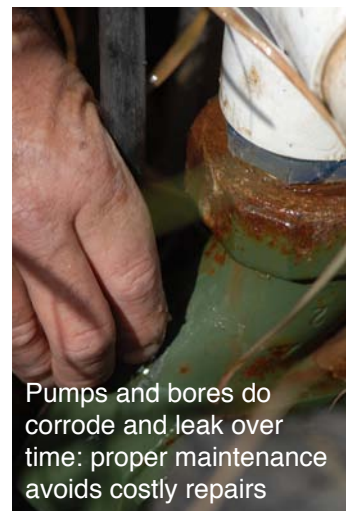

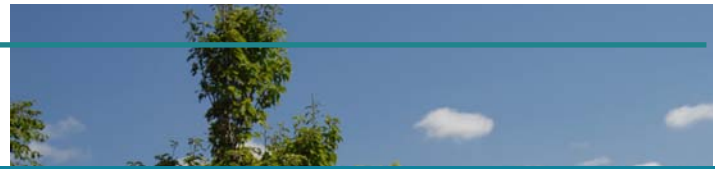

- Irrigation controllers
- Pump performance and controllers
- Pump voltage flows
- Relays and other components
- Bore performance and duty
- Pump configurations and pipework
- Control components such as flow switches, pressure switches and sensors

We would usually check the above at least every quarter or at a frequency nominated by the client.

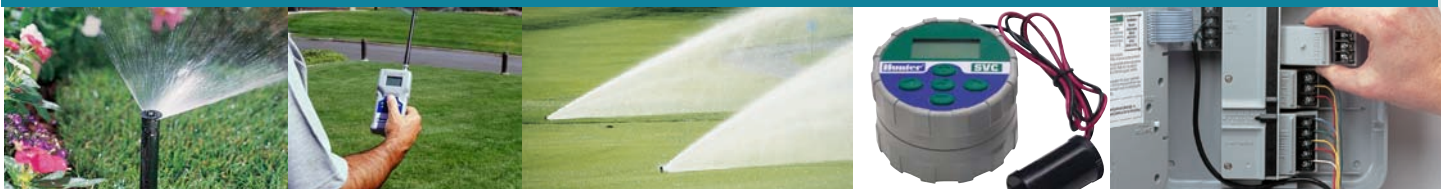

Our Maintenance Services also include off-site phone support for basic troubleshooting.

Our knowledge-base and resource pool is boosted by close association with Romano Grande and Ron Gleeson from Borewell.

Our clients also benefit from our good relationships with technical support teams at Grundfos, Lowara, Davey, Onga and Sta-right.

Pumps and bores do corrode and leak over time: proper maintenance avoids costly repairs

Avoid breakdowns, reduce costs – gain peace of mind
