

Rosebud Irrigation Pty Ltd

Sprinklers Pumps Tanks Design Installation Maintenance

p: (03) 5986 4294 f: (03) 5986 4298 PO Box 2122 Rosebud Plaza VIC 3939 ABN: 63 097 336 582

Irrigation systems, if left unchecked, have been known to cause quite a bit of damage and cost. We have found simple things as missing or blocked sprinkler heads and breaks in pipe can cause plant loss and damage to garden beds and/or lawns. These sorts of problems are found quite often and can be corrected if found early with minimal cost.

The service will be charged out at a reduced hourly rate of \$50 + GST per hour per person plus materials. All works will continue to comply with the current Australian Standards. We are fully qualified irrigation contractors and Ross McKay is a licensed member of the Irrigation Association of Australia, Plumbing Industry and Landscaping Industry Association of Victoria. All materials used are purchased from quality assured suppliers and covered by the guaranties and warranties set by the manufacturer. Our terms and conditions of service can be viewed on our website www.rosebudirrigation.com.au or a copy can be obtained from the office by request.

We wish to once again to thank you for you past support and assure you we will continue to provide you with the best possible service at all times.

If you would like to take this opportunity please complete the form enclosed and return it to us.

Thank you

Ross and Jenny McKay
Company Directors

Industry affiliations

Rosebud Irrigation is a member of the following Associations:

- Irrigation Association of Australia (IAA) Certified
- Landscape Industry Association of Victoria (LIAV)
- Plumbing Industry Commission

Maintenance Services for your home

How it works

(... and keeps on working!)

We look after your garden and systems. Why lift a finger? Sit back and relax – we keep it looking beautiful for you, your family and visitors to enjoy.

A typical Irrigation Maintenance Schedule would involve thorough checking and testing of:

- All sprinklers checked for coverage and performance
- Washouts and checks for pipe leaks
- Rainwaters systems and pumps
- Irrigation controller programs
- Pump performance and controllers
- Bore performance
- Power supplies to bore controllers and sprinklers.
- Control components such as flow switches, pressure switches and sensors

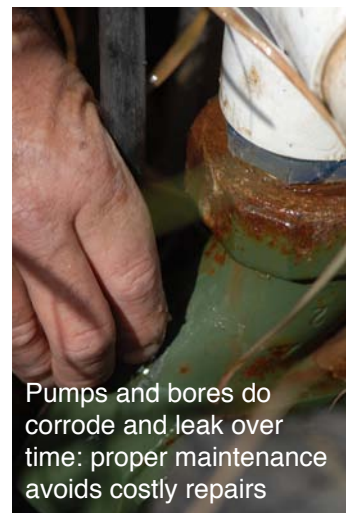

We would usually check the above at least every quarter, every month or seasonally.

Our Maintenance Services also include off-site phone support for basic troubleshooting.

Our knowledge-base and resource pool is boosted by close association with Romano Grande and Ron Gleeson from Borewell.

We are also an agent for Lowara Pumps which ensures best reponse times for pump maintenance.

We also have great relationships with technical support teams at Grundfos, Davey, Onga and Sta-right – so you get the best service every time.

Pumps and bores do corrode and leak over time: proper maintenance avoids costly repairs

Avoid breakdowns, reduce costs – gain peace of mind
